# FALLER

Art. Nr. 120291

Sa. Nr. 120 291 3

**D** Machen Sie sich bitte vor Beginn des Bastelns mit dem Bausatzinhalt und der Anleitung vertraut und prüfen Sie die Vollständigkeit. Im Reklamationsfall gilt die gesetzliche Gewährleistungspflicht. Sollte ein Teil fehlen, übersenden Sie bitte den Teilewunsch und den Kaufbeleg an: Gebr. FALLER GmbH, Kundendienst, Kreuzstraße 9, D-78148 Gütenbach, kundendienst@faller.de. Sollten Sie einmal weitere Ersatzteile benötigen, senden wir Ihnen den benötigten Spritzling, bei Verfügbarkeit, gerne kostenpflichtig zu. Bitte beachten Sie, dass produktionsbedingt Einzelteile übrig bleiben können.

**GB** Before building your model, please familiarize yourself with the contents of the kit and the instructions for use, also checking whether the set of parts is complete. In case of any complaint, the legal guarantee obligation shall apply. Should a part be missing, please send the designation of the part required and the receipt documenting your purchase to: Gebr. FALLER GmbH, Kundendienst, Kreuzstraße 9, D-78148 Gütenbach, kundendienst@faller.de. Should you require further spare parts one day, we shall be pleased to send you, with costs, the required sprue, if it is available. Please note that, on grounds of the production process, some single injection molded parts may be superfluous.

**F** Avant de commencer votre modèle, veuillez vous familiariser avec le contenu du kit et la notice d'emploi, et contrôlez que le lot de pièces est complet. En cas de réclamation, il s'appliquera l'obligation de garantie légale. Au cas où une pièce manquerait, veuillez envoyer la désignation de la pièce souhaitée et le bon d'achat à: Gebr. FALLER GmbH, Kundendienst, Kreuzstraße 9, D-78148 Gütenbach, kundendienst@faller.de. Au cas où vous auriez besoin un jour d'autres pièces détachées, nous vous enverrons volontiers la grappe requise, si elle est disponible, contre paiement. Veuillez noter que, pour des raisons de production, il se peut que des pièces détachées soient superflues.

**NL** Maak uzelf vóór het bouwen vertrouwd met de inhoud van het bouwpakket en met de handleiding en controleer de volledigheid. In geval van reclamatie geldt de wettelijke garantieverplichting. Macht er een onderdeel ontbreken, stuurhet verzoek om het gewenste onderdeel en het aankoopbewijs dan naar: Gebr. FALLER GmbH, klantenservice, Kreuzstraße 9, D-78148 Gütenbach, kundendienst@faller.de. Als u ooit meer reserveonderdelen nodig hebt, sturen wij het benodigde gietstuk, indien beschikbaar, graag tegen betaling naar u op. Let op: om productieredenen kunnen losse onderdelen overblijven.

Art. Nr. 170490 | 170492 | 170494  
FALLER SUPER-EXPERT | EXPERT | LASERCUT

Art. Nr. 170688  
SPEZIAL-SEITENSCHNEIDER

Art. Nr. 170687  
FALLER-BASTELMESSER

Für die Montage benötigen Sie Plastik-Klebstoff und Expert Lasercut-Kleber.

Wir empfehlen:

FALLER-Klebstoff EXPERT (Art. Nr. 170492)  
FALLER-Klebstoff EXPERT-Lasercut (Art. Nr. 170494)  
Sekundenkleber  
FALLER-Spezial-Seitenschneider (Art. Nr. 170688)  
FALLER-Bastelmesser (Art. Nr. 170687)

For mounting you need plastic cement and Lasercut cement.

Our recommendation:

FALLER cement EXPERT (Art. No. 170492)  
FALLER cement EXPERT-Lasercut (Art. No. 170494)  
Instant modelling cement  
FALLER special side cutter (Art. No. 170688)  
FALLER modeller's knife (Art. No. 170687)

Pour le montage, utiliser de la colle plastique et de la colle Lasercut.

Nous vous recommandons les produits suivants:

Colle FALLER EXPERT (Art. Nr. 170492)  
Colle FALLER EXPERT-Lasercut (Art. Nr. 170494)  
Colle rapide  
Pince coupante diagonale spéciale FALLER (Art. Nr. 170688)  
Couteau de bricolage FALLER (Art. Nr. 170687)

Voor de montage heeft u plasticlijm en Lasercut lijm nodig.

Wij adviseren:

FALLER-plasticlijm EXPERT (Art. Nr. 170492)  
FALLER-Lasercut lijm (Art. Nr. 170494)  
Secondenlijm  
FALLER-speciaal zijknijptang (Art. Nr. 170688)  
FALLER-knutselmes (Art. Nr. 170687)

**2** Auf allen Anfangsseiten sind die Spritzlinge aufgeführt, die man für die folgenden Bauabschnitte benötigt.  
Alle angefangenen Spritzlinge nach Gebrauch unbedingt wieder zurück in die dazugehörige Tüte legen, um die nötige Übersicht beizubehalten.

On all first pages you will find a list of the moulded parts that are required for the sections of construction that follow.  
Every moulded part you have started to use should imperatively be put back in the corresponding bag, after use, to maintain the general view that is needed.

Sur chaque première page figure la liste des grappes dont on a besoin pour les tranches de travaux qui suivent.  
Il faut absolument remettre dans la sachet correspondante, après utilisation, toutes les grappes entamées afin de conserver la vue d'ensemble nécessaire.

Op elke beginpagina staan de spuitgietstukken afgebeeld die voor de volgende bouwfases nodig zijn.  
Elk deels bewerkt spuitgietstuk na gebruik absoluut weer terug doen in de bijbehorende zakje om het noodzakelijke overzicht te kunnen behouden.

Die Anleitung 120291 beinhaltet den Bau der Containerbrücke mit Antrieb 180290 (liegt nicht bei). **Ein Nachrüsten ist grundsätzlich nicht möglich.**

Es werden Spritzlinge aus 120291 und 180290 verwendet.

Die Spritzlinge aus 120291 sind ohne Angaben der Artikelnummer, werden die Teile aus 180290 verwendet, steht die Artikelnummer dabei.

Den Bau der Katzbrücke ohne Antrieb finden Sie auf den Seiten 30 bis 34, mit Antrieb von Seite 35 bis 49.

Die Steuerung der Containerbrücke ist in der Anleitung 180290 von Seite 57 bis 80 beschrieben.

The instructions 120291 describe the assembly of the container crane with drive system 180290 (not included). **As a general principle, retrofitting is not possible.**

Moulded parts from 120291 and 180290 are used.

The moulded parts from 120291 do not include the article number; if the parts from 180290 are used, the article number is stated.

You will find the assembly of the cross-travel crane without a drive system on pages 30 through 34, and with a drive system on pages 35 through 49.

The control system for the container crane is described in instructions 180290 on pages 57 through 80.

La notice 120291 présente la construction du portique à conteneurs avec l'entraînement 180290 (non fourni). **Une modification ultérieure est en principe impossible.**

Utilisation de pièces moulées du 120291 et 180290.

Les pièces moulées du 120291 n'indiquent pas la référence article, contrairement aux pièces du 180290.

La construction de la grue à conteneurs sans entraînement se trouve sur les pages 30 à 34, et avec entraînement sur les pages 35 à 49.

La commande du portique à conteneurs est expliquée dans la notice 180290 page 57 à 80.

De handleiding 120291 omvat de bouw van de containerbrug met aandrijving 180290 (niet meegeleverd). **Achteraf inbouwen is in principe niet mogelijk.**

Er worden spuitgietdelen uit 120291 en 180290 gebruikt.

De spuitgietdelen uit 120291 hebben geen vermelding van het artikelnummer, worden onderdelen uit 180290 gebruikt, dan staat het artikelnummer erbij.

De bouw van de loopkat zonder aandrijving vindt u op de pagina's 30 t/m 34, met aandrijving van pagina 35 t/m 49.

De besturing van de containerbrug is in handleiding 180290 beschreven op pagina 57 t/m 80.

**Achtung: Die Containerbrücke ist in verschiedenen Längen baubar. Die Geländer müssen dann entsprechend gekürzt werden.**  
**Caution: The Container bridge-crane can be built with different lengths. Railings must then be shortened accordingly.**  
**Attention: On peut construire le Portique à conteneurs en différentes longueurs. Il faut alors raccourcir les garde-corps de façon correspondante.**  
**Let op: de containerkraan kan in verschillende lengtes worden gebouwd. De balustrades moeten dan passend worden ingekort.**

Für den Einbau der Schienen auf der Anlage ist es Wichtig, dass die zu bebauende Fläche absolut eben ist! Prüfen sie die Fläche mit entsprechenden Hilfsmitteln (Wasserwaage, Winkel) auf 100% Ebenheit. Kleben sie die Teile 6/1 absolut fluchtend hintereinander auf die entsprechende Stelle der Anlage.

Die schwarz/weiß-Rasterung (siehe Seite 5) muss min. 3 cm weiß zum Auslösen der Lichtschanke am Anfang und Ende enthalten und der Abstand von Lichtschanke zum Rollen Anfang/Ende muss zusätzlich berücksichtigt werden, damit der Schlitten an der richtigen Endposition hält und nicht zu weit fährt. Das gilt für beide Seiten der Schienen, am Anfang und am Ende.

To mount the rails on the installation, it is essential that the surface to build onto be perfectly level! Check with suitable tools (spirit level, try square) that the surface is level to 100%.

Glue parts 6/1 one behind the other, in perfect alignment, onto the selected surface area of your installation.

The black and white screening (see page 5) must contain at least 3 cm of white to ensure the triggering of the light-barrier at the start and at the end, the spacing of light-barrier and roller at the start and at the end having in addition to be taken into account to allow the travelling crab to stop in the right end position, without driving too far. This applies to both sides of the rails, at the start and at the end.

Pour la mise en place des rails sur l'installation, il est essentiel que la surface à bâtir soit parfaitement horizontale! Contrôlez que la surface présente une horizontalité à 100 % au moyen d'auxiliaires adéquats (niveau à bulle, équerre). Collez les pièces 6/1 les unes derrière les autres de façon qu'elles soient parfaitement alignées, à l'endroit correspondant de votre installation.

La trame noire et blanche (voir page 5) doit présenter au moins 3 cm de blanc pour assurer le déclenchement de la cellule photo au début et à la fin, et il faut en plus tenir compte au début et à la fin de l'espacement existant entre la cellule photo et le galet, pour que le chariot s'arrête dans la position finale correcte sans rouler trop loin. Ceci vaut pour les deux côtés des rails, au début et à la fin.

Voor het aanbrengen van de rails op uw modelopzet is het belangrijk dat het betreffende oppervlak absoluut vlak is! Controleer met geschikte hulpmiddelen (waterpas, winkelhaak) of het oppervlak ook daadwerkelijk 100% vlak is. Plak de onderdelen 6/1 absoluut op één lijn achter elkaar op de betreffende plek van de modelopzet.

De zwart/wit-rastering (zie pagina 5) moet aan het begin en aan het einde min. 3 cm wit bevatten om de fotocel te activeren en er moet ook rekening worden gehouden met de afstand van de fotocel tot start/einde rollen om ervoor te zorgen dat de slede bij het juiste eindpunt stopt en niet te ver doorrijdt. Dit geldt voor beide kanten van de rails, aan het begin en aan het einde.

Auf Ebenheit des Untergrundes achten!  
 Make sure the support is level!  
 Veiller à ce que le support soit horizontal!  
 Let erop dat de ondergrond vlak is!

**E**

**D**

Aufgrund der niedrigen Betriebsspannung des Antriebssset und der Widerstände auf der LED-Platine, die für 16 V ausgelegt sind, müssen die Anschlüsse auf der LED-Platine umgelötet werden. Die Lampen benötigen im eingeschalteten Zustand zusammen ca. 200 mA und belasten somit den Akku entsprechend. Um optimale Leuchtkraft zu erlangen werden die Drähte direkt an die LED gelötet. Es ist darauf zu achten das keine anderen Verbindungen entstehen. Optional kann der Rest der Platine weggeschnitten werden.

Due to the low operating voltage of the drive set and the resistors present on the LED PCB, which are designed to operate on 16 V, the soldering of connections on the LED PCB has to be modified. The lamps, when lighting, will together require approx. 200 mA and put the corresponding strain on the rechargeable battery.

En raison de la basse tension de fonctionnement du kit d'entraînement et des résistances présentes sur la carte à LED, lesquelles sont dimensionnées pour 16 V, il faut changer le brasage des raccordements sur la carte électronique à LED. À l'état allumé, les lampes vont consommer ensemble env. 200 mA et vont donc solliciter l'élément rechargeable en rapport. Pour obtenir une intensité lumineuse optimale, on brase les fils directement sur les LED. Il faut veiller à ce qu'il n'y ait pas d'autres liaisons. Une option consiste à couper le reste de la carte.

Op grond van de lage bedrijfsspanning van de aandrijfset en de weerstanden op de led-printplaat die voor 16 V ontworpen zijn, moeten de aansluitingen op de led-printplaat ergens anders worden gesoldeerd. De lampen hebben in ingeschakelde toestand samen ca. 200 mA nodig en belasten de accu dus overeenkomstig. Om een optimale lichtsterkte te krijgen, worden de draden direct aan de led vast gesoldeerd. Er moet op worden gelet dat er geen andere verbindingen ontstaan. Optioneel kan de rest van de printplaat worden afgeknipt.

1 x 600 mm

Funktionstest: Prüfen Sie vor dem Weiterbau die Funktionsfähigkeit der Kranbahn-Antriebe. Eine Beschreibung des Funktionstests finden Sie ab Seite 57 dieser Anleitung.

Sonderfunktionen: Als Standardfunktionen umfasst das Antriebs-Set die Bewegungssteuerung des Hauptfahrwerks, der Laufkatze und des Spreaders (heben/senken). Die Steuerung per Software von bis zu vier weiteren Schalt- oder motorischen Anwendungen Ihrer Wahl (Je 3,3 V, max. 120 mA, gesamt jedoch nicht mehr als 350 mA) ermöglichen die freibleibenden Ausgänge Pin 16 auf der Primärplatine sowie Pin 4, Pin 5 und Pin 16 auf der Sekundärplatine. Die vorliegende Anleitung beschreibt beispielhaft den Einbau und Anschluss einer möglichen Sonderfunktion »LED-Lichtsteuerung«. Weitere Möglichkeiten sind z. B. ein Zusatzmotor, LED-Beleuchtung mit optionaler Blink- oder Fadfunktion, die Steuerung eines Elektromagneten, u. v. m. Bitte beachten Sie, dass eine nachträgliche Ausstattung mit Sonderfunktionen nach Fertigstellung des Modells nicht möglich ist. Falls Sie sich diese Entscheidung offenhalten möchten, müssen Sie jetzt die notwendigen Verbindungen an eine der Platinen oder an beide Platinen anlöten. Falls Sie planen, Ihre Containerbrücke mit zusätzlichen Funktionen auszustatten, finden Sie eine Beschreibung und Anschlusszeichnungen ab Seite 57 dieser Anleitung.

Function test: Before you go on building the model, check that the crane rail motors are working. A description of the function test is on page 57 of this instruction manual.

Special functions: The default functions of the drive set are the movement control of the main carriage, trolley and spreader (raise/lower). Software control of up to four additional switch or motor functions of your choice (3.3 V each, max. 120 mA, but not more than 350 mA in total) is possible via the free outputs, pin 16 on the primary PCB and pins 4, 5 and 16 on the secondary PCB. As an example, these instructions describe the installation and connection of a possible special function »LED lighting controls«. Further possibilities are e.g. an additional motor, LED lighting with optional blink or fade function, controls for an electromagnet, and much more. Please note that it is not possible to equip the model with special functions after completion of the construction. If you want to keep the option open, you should solder the requisite connections on one or both of the PCBs now. If you plan to equip your container crane with additional functions, you can find a description and connection schematics on page 57 of this instruction manual.

Fonctions spéciales: L'ensemble moteur comprend par défaut la commande de mouvement du châssis principal, du chariot et du palonnier (lever/baisser).

Les sorties libres Pin 16 sur la carte primaire et Pin 4, Pin 5 et Pin 16 sur la carte secondaire permettent de contrôler par logiciel jusqu'à quatre autres systèmes de commutation ou de moteur de votre choix (3,3 V et 120 mA max. chacun, mais pas plus de 350 mA au total). Ce mode d'emploi décrit par exemple l'installation et le branchement d'une éventuelle fonction spéciale »de contrôle d'éclairage LED«.

Parmi les autres possibilités, on peut contrôler un moteur supplémentaire, un éclairage LED avec option clignotement ou intensité variable, un électro-aimant, etc. Veuillez noter qu'il n'est pas possible de monter ultérieurement des fonctions spéciales une fois que le modèle est terminé. Si vous voulez garder cette possibilité, vous devez dès maintenant souder les connexions nécessaires à l'une ou aux deux cartes.

Si vous prévoyez d'équiper votre grue à conteneurs de fonctions supplémentaires, vous trouverez une description et des plans de branchement à la page 57 de ce mode d'emploi.

Functietest: Controleer voor u met de montage verdergaat de goede werking van de kraanbaanaandrijvingen. Een beschrijving van de functietest vindt u op pagina 57 van deze handleiding.

Speciale functies: De standaardfuncties van de aandrijfset zijn de bewegingsbesturing van het hoofdonderstel, de loopkat en de spreader (omhoog/omlaag). De besturing via software van maximum vier extra schakeltoepassingen of motorische toepassingen naar keuze (Elk 3,3 V, max. 120 mA, in totaal echter niet meer dan 350 mA) maken de vrijblijvende uitgangen pin 16 op de primaire printplaat en pin 4, pin 5 en pin 16 op de secundaire printplaat mogelijk. Deze handleiding beschrijft bijvoorbeeld de montage en aansluiting van een mogelijke speciale functie »led-lichtbesturing«. Andere mogelijkheden zijn bijvoorbeeld een extra motor, ledverlichting met optionele knipper- of fadefunctie, de besturing van een elektromagneet en nog veel meer. Houd er a.u.b. rekening mee dat het niet mogelijk is om na de afwerking van het model deze speciale functies te installeren. Als u deze mogelijkheid wil openhouden, moet u nu de vereiste verbindingen op een van beide printplaten of beide printplaten solderen.

Als u plant uw containerbrug met extra functies uit te rusten, vindt u een beschrijving en aansluitingsschema's op pagina 57 van deze handleiding.

Von den Enden der Perlonfäden (4 x) jeweils nach 250 mm eine Wäscheklammer anbringen (Faden muss auf Spannung sein!).  
Den Motor an max. 5 V anschließen und Fäden aufwickeln bis die Wäscheklammern oben angekommen sind (Achtung: Motor schaltet nicht selbstständig aus!).

Attach clothes pegs 200 mm above the ends of the 4 nylon strings (strings must be under tension!).  
Connect the motor to max. 5 V and wind up the strings until the clothes pegs reach the top (careful: motor does not stop automatically!).

Fixez une pince à linge tous les 200 mm avant les extrémités des fils en perlon (4 x) (le fil doit être tendu !).  
Branchez le moteur sur 5 V max. et enroulez les fils jusqu'à ce que les pinces à linge arrivent en haut (attention: le moteur ne s'arrête pas automatiquement!).

Breng voor de uiteinden van de perlondraad (4x) telkens na 200 mm een wasknijper aan (draad moet onder spanning staan).  
luit de motor op max. 5 V aan en wikkel de draad op tot de wasknijpers boven aangekomen zijn (opgelet: motor schakelt zichzelf niet zelfstandig uit).

**Fensterfolie**

Die beiliegende Fensterfolie entsprechend der benötigten Größe ausschneiden und vorsichtig mit wenig Klebstoff auf die Rückseite der Fensterrahmen aufkleben.

**Window foil**

Cut the attached window foil according the illustrations and glue it carefully with a little glue to the rear side of the window frames.

**Feuillet transparent pour fenêtres**

Découper le feuillet transparent pour fenêtres inclus d'après l'illustration. Coller proprement avec un peu de colle sur la face arrière du cadre des fenêtres.

**Vensterfolie**

De meegeleverde vensterfolie conform de afbeeldingen uitknippen of uitsnijden en voorzichtig met een beetje lijm op de achterzijde van het raam plakken.

Die Stifte vorsichtig entfernen. Danach die Vorrichtung sehr vorsichtig entfernen! Dazu ggf. die Laufkatze bereits auf die Schienen stellen.  
 Cautiously remove the pins. After that remove the device with the utmost care! It may be judicious to place right now the travelling crab on the rails.  
 Enlever les ergots avec précaution. Enlever ensuite le dispositif très prudemment ! Éventuellement, placer dès maintenant le chariot roulant sur les rails.  
 De pennen voorzichtig verwijderen. Daarna de voorziening heel voorzichtig verwijderen! Daartoe eventueel de loopkat al op de rails zetten.

**Variante II:**
